**All products are in a base of 10% USP alcohol, 8% USP vegetable glycerin and PVM Water™ (Purified Vibrational Memory). PVM Water™ is purified water processed through Always Young's proprietary technology. All pre-existing vibrational memory is stripped out and the result is a super-charged water that is highly coherent and optimized for retaining the highest level of vibrational resonance from our ingredients. We then infuse the water with full spectrum light for maximum cellular energy. This newly structured water is now primed for maximum absorption into the cells of the body.*
